

**JHU Engineering for Professionals
Applied and Computational Mathematics
Data Mining 625.740**

**Project Proposal
Due September 22**

Please write one half up to approximately one page describing what you intend to do for your class project. Please include

1. the general idea of your project,
2. what are some of the anticipated challenges?,
3. what are some of the interesting results you hope to see?,
4. what you plan to use for data,
5. what algorithm(s) you plan to use.

The project proposal is due Sept. 22, and should describe your intended topic.

The project

The project will consist of a report and a presentation. The presentation is anticipated to be a recorded talk by each student of approximately 12—15 minutes, and should include the main points and results of your work. Please aim to tell a story and to make the presentation interesting. You should be able to summarize what you've done and what results you have found. More details and analysis should be included in the accompanying paper.

The project (presentation slides, paper, and presentation) is due Nov. 17.
